Syntax

MONNAME*w*.

Syntax Description

w

  specifies the width of the output field.

Default	9
Range	1–32
Tip	Use MONNAME3. to print the first three letters of the month name.

Details

If necessary, SAS truncates the name of the month to fit the format width.

Example

The example table uses the input value of 19057, which is the SAS date value that corresponds to March 5, 2012.

SAS Statement	Result
	----+----1
put date monname1.;	M
put date monname3.;	Mar
put date monname5.;	March
